Serving Indian consumers since 1982

Editorial

My dear readers,

In last month's editorial, I informed you about the need of eNewspaper to be published by Indian language newspaper industry on web. Few newspapers are doing this (may not be scientifically but with whatever ways & means, choices, etc. each one of them had). But large numbers of Indian language newspapers are yet to understand & realise the importance of eNewspaper.

While I was writing this editorial, I also read another wonderful & powerful news article that matters to India, to Indians and to Indian Newspaper industry.

- *Please do visit this web link: http://www.newseum.org/todaysfrontpages/flash/ & do read the article.*
- *Subject of the article is "Starting today, the Newseum is testing a watermarking system to prevent illegal downloads of the newspaper front pages."*

- *Do share with others.*
- *Do spread this.*
- *Empower India and empower Indians.*

Global warming, paperless office, etc. are buzz words of today's time and they have been discussed, debated, etc. for last one decade. But we as Indians, are we reacting on it, are we working-acting on it, are we taking necessary steps? Each question would be INR 1.00 Cr. question.

But to support this aspect of business, your Modular is geared up to handle the task in hand. Modular has floated full-fledged BPO division. In this division, we do help our customers to make their office as paperless office.

- *We have already won 2 newspaper customers whose already printed newspapers are getting converted in to eFormat.*
- *We have already won 2 educational institutes orders. In one order, we are converting large number of books in to eFormat. In another institute, we are converting "hand-written Sanskrit slips" in to "searchable database engine"*
- *We have already won contracts from a number of ship building firms from Singapore where important help manuals, drawings, etc. are getting converted in to eFormat.*
- *We have also won Govt. of India's undertaking organisation order for converting huge number of already printed documents in to eFormat.*

We are also happy to inform you that, your Modular developed a very unique homemade "scanner" to handle these challenges. This is very unique development from India perspective because many times, we as Indians do bank on/rely on MNC's. In that context of discussions, this is really news to be proud of that we would like to share with you.

If time permits and if there is a task in hand which inspires you to visit Pune? Please do visit Modular office and have a look at this development done by your Modular.

Thanks to Mr. R. R. Joshi (Founder & Director) and his entire team to come out with this tailor-made unique product that gives us a great space against all odds/evens.

Thanking you and wishing you all the best.

Mahesh Mule, Ambegaon Bk, Pune.

I am using Shree-lipi since last 10 years, it is very easy to use for Marathi & Hindi Typing. Fonts variety, fonts shapes, sharpness, clarity in this software is great.

Sachin G Yadav, Ambajogai

I am using Shree Lipi 7.1 version since from 29.06.2009 and getting better results from any other marathi lipi's therefore I advice everyone to use shree Lipi Modular for future.

Anant, Satara

Res. sir i am doing marathi typing last 6 years. can you provide marathi typing home jobs. send information please. regards

Rajendra Devnikar, Nanded

This magazine is helpfull for Delers/ Resellers for our Products. so many thanks for this. also send latest price list to all reseller.

Gopal Rathod, Kalyan (w)

Please Give Command Or Shortcuts Of CorelDRAW & Photoshop

Prashant Gulhane, Yavatmal

Dear sir, I am using modular Shree-lipi since2008 and I am very happy with the software. Typing in Marathi by using Shree-lipi is very easy. it saves the time. Currently I am using 6.0 Version. Thanks and I wish you all the best.

Digitization

Digitization is the conversion of paper documents to an electronic form.

Trend

The transformation of twenty-first century business is under way using the modern Digitization Technology. At the heart of this wide-ranging transformation is the use of technology to provide services of digitization, archival and retrieval of documents.

Market leaders in every industry are quietly incorporating as much digital technology into their products, processes, and services as possible. These companies are beginning to see the financial results—better operating margins and lower costs and faster access to data —with the added plus of real-time interaction with the customer.

Modular Infotech Pvt. Ltd. provides a One Stop Solution for all your Digitization, Archival and Retrieval requirements.

Digitization Services include

- Digitization of Office Documents, Manuals, Bound Volumes, Diagrams, Newspapers, Books, Articles, Magazines, Photographs, Maps, Manuscripts, Rare Books, Journals, Paper-records and Born-digital records, which can all be of various sizes.
- Data Conversion from one file format to Searchable PDF with XML Metadata, JPEG, TIFF, XML, HTML, DOC Etc.
- Conversion of Books into PDF files/E-Books.
- Digitization of Medical Records.
- Optical Character Recognition (OCR).
- Keypunching, Date capture & Form Processing (English and Indian Language).
- Creation of metadata for documents.
- De-speckling, de-skewing, cropping, image-processing, QC to required accuracy level, Image Editing, image processing and restoration, cleaning and archival is done - usually in .pdf, or any other user specified format.
- Indexing.
- Uploading of digitized documents to DMS.
- Archival/Retrieval Solution.
- Supply and Implementation of DMS.

Benefits

- Reduction of paper handling and error-prone manual processes
- Reduction of paper storage
- Reduction of lost documents
- Faster access to information
- Online access to information that was formerly available only on paper, microfilm, or microfiche
- Sharing information without creating paper copies
- Lowering costs of physical storage and retrieval.
- Preserving Integrity of records.

Tips and Tricks for Shree-Lipi

1. After installing Shree-Lipi Software, when you click on Shree-Lipi 32 bit, you are getting message "Error loading module. Error code-1, Language symbol Shree-Lipi 4.0/5.0/6.0".

Ans : 1.Note: Close all Shree-Lipi applications.

a. Click on < Start >

b. Click on < Run >

c. Type < regedit >, Registry Editor Window will open up.

d. Click on < + > sign, next to < HKEY_CURRENT_USER >

e. Click on < + > sign, next to < Software >

f. Select the folder < Modular Info Tech>

g. Right Click the folder and click on < Delete >

h. Click on < + > sign, next to < HKEY_LOCAL_MACHINE >

i. Click on < + > sign, next to < Software >

j. Select the folder < Modular Info Tech>

k. Right Click the folder and click on < Delete >

l. Close Registry Editor and restart the system.

2.If you are using Shree-Lipi 7.1, part no. 13 & above

Go to start => Program => Shree-Lipi Dev Ratna => click on Modular Registry Cleaning Utility, Choose All Modular Registry and Click on Delete Registry button.

3. After deleting registry entry, Delete the msscr_32.exe / SL7_32.exe process in the task manager and then open Shree-Lipi Dev Ratna 32 bit

OR

If you have not installed any language while installing Shree-Lipi software then also this error comes. You have to select at least one language while installing Shree-Lipi software.

OR

If your system is infected by virus, or all the programs and files are not copied in Shree-Lipi installation folder then also this error comes. You have to remove the virus and reinstall software.

2. Why is the 'Set Font on Script change' option given in Shree-Lipi main menu?

Ans : If you are composing bilingual documents (English and one Indian language) in say MSWord, you will have to change the script frequently. After changing the script, the font and point size for that script also will have to be set. This is time consuming. To eliminate this, the 'Set Font on Script change' option is provided. If this option is enabled, on toggling the activation key, the font and point size in applications like MS Word, WordPad and Adobe PageMaker change to the default font and size set for that script in the Shree-Lipi main menu.

3.Why setting of Application Type is necessary?

Ans : Shree-LIpi has taken care of most of the application settings on selection of "Automatically detect application type" option, but if you are using any new application which is not listed then Shree-Lipi may not work correctly with the new Windows Application or a new version of the software i.e. composition may not work properly, you may get repeated characters or characters may not appear at all. In such a scenario you may have to tune Shree-Lipi to work with the respective application.

To do this

1.Click on the icon of Shree-Lipi in the system tray.

2.Uncheck Automatic Detection of Application Type.

3.Point to Application.

4.Keep on changing the Application Type one at a time and try composing in the application using Shree-Lipi.

5.Repeat the above step until you are satisfied with the performance.

6.The correct application type will be preserved for future use.

Tips and Tricks for Windows and Applications

1. Better Windows 7 System restore function
Using System Restore in Windows XP is not reliable. There's no way of telling which applications or drivers are affected. Restore functionality has been improved a lot in Windows 7.
In Windows 7 Right-click "My Computer", select "Properties -System Protection -System Restore – Next", and choose the restore point you'd like to use. Click the new button to 'Scan for affected programs' and Windows will tell you which (if any) programs and drivers will be deleted or recovered by selecting this restore point. (Read full Windows 7 System Restore tutorial.)

2. How to enable private mode in IE8 with windows 7
Internet Explorer 8, with Windows 7, includes a new enhancement called **InPrivateTM Browsing**. InPrivate Browsing helps prevent browsing history, temporary Internet files, form data, cookies, and usernames/passwords from being retained by the browser.
You can start an InPrivate session straight from the Internet Explorer Jump List by right-clicking the Internet Explorer icon on the taskbar, and then click "Start InPrivate Browsing."

3. Easy way to write .ISO files in CD/DVD using windows 7
Windows 7 easy to use applet that makes burning an .ISO image simple. Double click the DVD or CD .ISO image and the "Disc Image Burner" applet automatically appears.
• Place a blank CD or DVD into your CD/DVD drive.
• Right click on the .ISO or .IMG file you want to use to burn a disc.
• Click "Burn Disk Image."
• Next to Disc burner, click on the drop down arrow and select the CD/DVD drive with the blank disc you want to burn to.
• Check the Verify disc after burning option if you want Windows to verify the disc image after burning the disc.
• When it finishes burning the disc image to disc, click the Close button.
