Modular Infotech's SSAB Scan, Speak and Braille Device is an affordable and easy-to-use solution for reading a wide variety of printed material, including books, documents, magazines, etc.

SSAB uses the latest in advanced OCR (optical character recognition) technology to scan text and then read it in natural sounding, clear speech. SSAB can store and remembers the contents of thousand of books and documents in its internal storage.

You can start using SSAB without any complicated setup, with no experience or training. Just place your book or document on the SSAB, and press the scan button. SSAB automatically recognizes the text and speaks it out. During the reading, you can adjust the voice rate and volume as well as fast forward and rewind. If it is required to examine a document in detail, one can pause and use the navigational keys to read line by line.

Choice of Speaking Voice

One can choose from different male or female voice for your preference of Speaking voice, and speech rate, and volume.

Conversion to Braille

There is an option available for SSAB whereby the scanned and OCRed text is converted to a Braille file. This file can be used to emboss books on an embossing system.

Low Vision Display

There is an option available for SSAB whereby the low vision user, can attach a computer monitor to SSAB, providing large size display with choice of colour to complement the spoken output. Facility is available to change the print type style, color, size, and spacing to suite user preference.

Optional Features

- Conversion to Braille files
- Display for Low-Vision persons
