श्री WebSamhita™
Universal

A toolkit for Internet developers to integrate Indian languages

WebSamhita Universal is a toolkit for Internet developers to integrate Indian languages into web sites and convert existing English only sites to Indian languages as well as to develop new sites with Indian language support. It can also be used to develop email solutions, chat applications, discussion forums and various other browser based applications.

It consists of Javascript and XML files and exposes an API to enable typing.

One can compose in Indian language in HTML elements like input (type text), textarea and editable div tag. On toggling SCROLL lock key switching between Indian language typing and English is possible.

When using div HTML element, rich editing features like bold, italic, underline, justification etc. can be used.

No installation is required for this toolkit. Indian language typing is directly done in Unicode. This can be stored directly in the database also.

This toolkit is developed completely in Javascript and hence can work with any server - Linux or Windows. It can be integrated with HTML, ASP, ASP.NET, JSP, JAVA servelets, JSF etc.

Features

- A simple thin toolkit which is compatible with major browsers like IE, Google Chrome, Firefox, Safari and Opera.

- Various keyboard layouts supported

- Keyboard tutors for different layouts like Phonetic, Inscript etc. supported

- Indian language Javascript fully compatible with any of the following OS's on client side - Linux, Windows, Mac OSX, iOS etc. provided Indian language Unicode fonts are present on the machine.

- Indian language toolkit fully compatible with all web servers on server side

- Fully compatible with all Unicode compliant databases on the server side
